

POLTY'S DCC TO WIRED AND WIRELESS LED SIGNS

How Does DCC EX Improve My Facility?

- **Increased Mobility:** Caregivers can receive alerts no matter where they are in your building
- **Shorter wait times:** Use reports to improve caregiver response time
- **Proactive Monitoring:** Administrators and/or owners can be notified by email or text message if a call for help is not answered
- **Atmosphere:** No noisy bells means a more home-like environment for residents
- **Market Your Community:** Show incoming families how good your caregiving services are

Polty's **Direct Care Connect DCC™** provides you with support for wide corridor displays to inform caregivers visually about the latest engaged resident calls.

When requiring multiple units to communicate the resident calls, the displays can be networked and connected to a DCC Server, to form a powerful integrated visual information system throughout your caregiving facility.

DCC INTEGRATION

Pollys DCC directly integrates with many wireless sensors, industry-standard Nurse Call Systems and Fire Alarm Systems.

TEXT NOTIFICATION

The alarm notifications are sent to DECT phones and mobile devices as text messages.

Caregivers can select whether to accept, reject or call back the resident just by pressing predefined buttons on the DECT phone keypad/ mobile device display.

MOBILITY BY DCARE EX

The caregiver connects using a Employee PIN defined in DCC EX selects an escalation set (working zone) that serves on that day.

Voice announcements and text alarms are received by caregiver. Text alarms are simultaneously displayed and played back by caregiver mobile device.

Caregiver may accept or callback a predefined phone number by tapping specific buttons on the mobile device.

Once the alarm was cleared at the resident place the Caregiver can close it after the resident request was handled or it can further require assistance from Employees with other competences (Nurses, Doctors, Maintenance, etc).

CAREGIVER LOCATION TRACKING

DCC may track caregiver location (i.e. Android mobile phone) within the care giving facility.

The locations are identified using Bluetooth Low Energy (BLE) beacon devices. Each room/ location is stuffed with one/ two BLE beacons.

CALLBACK USING GSM OR LOCAL PBX

Pollys DCC allows Caregivers to call back to a predefined phone number by mobile or DECT devices connected to PBX after the alarm was received.

KEY FEATURES

- POCSAG paging compatible for wireless paging devices
- Compatible with many IP-PBXs and Phone Devices. Refer to [Device Compatibility List](#).
- Flexible Deployment options: On-Premises or Hosted in the Cloud
- Scripted Based Integration for various interfaces
- Cross-Platform Web Administration Windows, Android, iOS and Mac OS
- HTTPS Security Protocol
- Employee (Caregiver) Activity Logging
- Zone Login in for Caregivers
- Competence/Skills based Alert Routing
- Powerful Reports
- Provisioning and Auto Updates over the Cloud
- DCare EX mobile client for Android devices
- Wireless LED Signs compatible with POCSAG transmitters

LED CORRIDOR SIGN HARDWARE

- Wired LED Sign

- Wireless LED Sign (POCSAG compatible)

- Wireless Paging Transmitter (POCSAG compatible)
